On October 28th, 2010 13:30

Present

Bianchetti, Tim

Blair, Colby

Nilson, Alex

Wegner, Leah

In Attendance

None

1 Actions for consideration

1.1 Action

- All group members are to decide on items to go into a major backlog that will hold items until semester end
- All members will also decide on items derived from backlog for the 2 week Scrum sprintlog
- This is the first meeting, so we have no previous minutes. We also did not need to conduct a Scrum Review or Reflection.

- Scrum Planning
 - Setup CVE.
 - Start with GUI (visual representation).
 - * Consider Iffy / ambiguous use cases in relation to the GUI representation.
 - Create class diagrams.
 - Create state charts if they are useful at this stage.
 - Create action charts if they are usefully as well.
 - Every member should pick at least one user-clickable use case and refine it in the usecase master file.
 - base prototyping of those use cases.

2 Any Other Business

- Division of labor will begin on the next daily scrum meeting, when everyone has a change to look at the use cases they may want to prototype.
- The dates for future meetings are 21:00 via Skype.

3 New Business

None

Meeting closed at 13:45
