Sasha Kopriva

Requirements Solicitation: Photography Club, Chandler Abraham

Does your club have a website? Is it regularly updated?

How is your club currently organized?

What special needs does your club have? (i.e. paying fees online, file sharing, picture sharing, etc)

Do you keep track of your club members?

Would your club need a specialized website template or interface ? (i.e. special hierarchy, all members have leadership authority, template with picture viewing abilities, etc)

Are there any requests for what your group would want or need in an online club management tool?

1) Nope, we don't have a website at all. We primarily use our facebook group.

2) Our club is currently only organized using a facebook group, we don't have an official membership list. This is a bit of a problem but I haven't decided on a solution yet. We tried having an excel spreadsheet for our members but it's been difficult to get new people to officially sign up and not just show up at meetings and leave.

3) Our biggest special need is the ability to contact a subsection of our members to let them know about sporting event dates. Not all of our members are interested in sports photography so I hesitate to use a facebook message to the whole group but gathering up peoples email addresses has been a pain so right now I've just been personally asking people if they want to shoot an event.

Also we want to have the ability to rent out club owned camera equipment to our members. This would mean keeping track of who is eligible to rent the equipment based on attendance, previous use of equipment and payment of fees.

4) Our club has a pretty standard organization. Members and an officer team which is appointed by it's members.

5) mostly what I described in the previous questions. We need an easy way to sign up to be an actual club member. We need to be able to easily notify sub sections of the club and we need to keep tracking of equipment rentals.
